

# POLISHED CONCRETE - JULY 26-28

***Featuring Ride on Trowel Technology and Planetary Grinder Polishing  
"A 360 training from Concrete Placement to Proper Stain Protection"***

---

Unlike other "Free Polished Concrete Training Classes", our Goal is not to just sell you product, but to sell you Knowledge and Education. We will be taking our 22 years of Polished Concrete Experience and helping "YOU", The New or Pre-existing Business Owner to either expand your current business or for those of you starting out, to help you get up and running.

This class will cover actual case history projects of what can happen on projects and how to overcome obstacles that arise on virtually every job site that can affect your bottom line as a contractor.

During this class you will learn proper joint filling considerations, grout coating, color matching techniques for repairs, crack repair and the use of walk behind planetary grinders for polishing in addition to ride on trowel technology for polishing, Featuring SASE and Runyon Surface Prep.

We will also be covering the Decorative Aspects of the business such as design layout and coloring techniques in addition to the use of common testing devices, such as: Profilometers (RA Meter), DOI Meter (Distinctness of Image) and MOH's Surface Hardness Pencils.

Attending the class will be Factory Representatives from SASE, Runyon Surface Prep and Metzger McGuire, so take advantage of the wealth of knowledge from these three manufacturers as well.

Bonus coverage will include a "Behind The Trowels" live show sponsored by Runyon Surface Prep one afternoon after the class has been completed of which students attending are encouraged to stick around for and participate as needed.

If you are serious about expanding your Polished Concrete knowledge or if you are just starting out, you will not want to miss this class, located at our new quaint facility, located at 280 Lakeview Drive, Temple, GA. 30179.
