

STAMPED CONCRETE

October 4-5-6, 2019

Come join us for this exciting class on Stamped Concrete. Different coloring techniques will be utilized such as integral color, color hardeners, EZ-Tique, Accent Color, Acid Stains and more. This class will cover the importance of understanding mix design, proper placement and finishing techniques. Learn how to install monolithic borders to take your stamp work to the next level.

We will also cover stamping, Stair risers and treads, in addition to teaching patching techniques to make you a full rounded stamped concrete craft person. Come learn the full Proline Concrete Tool Product line. Although there will be classroom time covering topics such as subgrade preparation, proper forming considerations, stamp layout, coloring, repairs and sealing, come prepared for plenty of hands-on stamping. Tyler Irwin, Owner will also be In attendance to assist at this event.

Price: \$1000.00 / Student

Attendees will receive 20% off any product purchase!
